Vision and Mission

Vision :

Be a leader of trading company for o-rings, hydraulic – pneumatic seals, mechanicals seal and also in specific products related in sealing components in Indonesia.

Mission :

Our focus to Oil and Gas, petrochemical, chemical, Mining, steel, tire industry and other related heavy industry. Beside selling elastomer product, we would like to provide education to industrial person about how important of choosing the appropriate compound of o-ring & seal. Because improper use of seals not only could damage the equipment but also fatal injury.

Business Strategy

Firstly, we serve all of customer needs especially on elastomer product. Then customer give list o-ring & seal or we identify, stock their demand on partnership proposal program for the best price & availability. Continually, we would like to find the best quality & competitive sub-distributor in all around market area. This would give "**Win-Win Solution**" for both company. Our company provide stock items, inventory control, technical support, delivery service. Meanwhile, customer get advantage of fixed priced during term of contract, competitive price, reduce idle time & man hours, no administration cost & warranty of product quality.

Special for rubber product, we can make tooling based on customer request. Customer could provide sample of product, we make tooling then produce the product. Or customer provide tooling then we produce the product. In others words we would like to be "**Customer Driven Company**".
